Company History

Our company was established in 1962. From that time until the present, the business has been owned and operated by the Parker family. The Parker family prides itself on building a quality piece of furniture at an affordable price.

The Product

We produce premium upholstery, offering stationary sofas, loveseats, sleepers, sectionals, chairs, and ottomans.

I. Frames

Our frames are assembled using kiln-dried and engineered hardwoods. Our CNC router technology achieves the highest level of engineering and precision when producing our frames, even those with angles and curves. Our CNC router technology also allows Temple to be ultra efficient and quick at customizing frames to suit our customer's desires. Each frame features state of the art interlocking design that will last a lifetime; Guaranteed!

II. Seat Construction

Our furniture features an 8-Way hand-tied coil spring construction on all pieces. This system, industry wide, is regarded as the best of all spring systems for upholstered furniture. The 8-way hand-tied method assures you the most comfortable and durable seating available in the furniture industry today. Due to frame construction, our motion furniture uses drop in units.

III. Sleeper Information (see below for Sleepmaster information)

Innerspring Mattresses (available in all sizes):

Our sleeper mechanism is the Classic Square XL unit by Leggett & Platt. This top quality unit is made of heavy-gauge, square tubular steel and features a tilt TV-Headrest. The unit is 3 inches longer than most units in order to accommodate our 75-inch mattress. All sleepers feature a 5½" Deluxe Innerspring mattress with hypoallergenic padding.

<i>Mattress Sizes:</i>	Queen 60" x 75" x 5½"	Twin 41" x 75" x 5½"
	Full 53" x 75" x 5½"	Chair 32" x 72" x 5½"

Hi-leg Styles and Styles #2000 - #2600 Features:

*round tubular steel mechanisms *mattress is 72" long *all other features are same as above

Air Mattresses (available as Queen, Full, or Chair):

With the convenient easy-to-use hand held remote control pump, inflating and deflating are a breeze. "Air Dream Ultra" is 11" of pure comfort that inflates in under one minute. Innovative technology combines spring coil support with a cushioning layer of air. The touch button firmness adjusts from plush firm to supportive soft feel. The mattress deflates easily and quickly for fast storage in the sleep sofa. In no time at all, you'll be resting comfortably!

Memory Foam Mattresses (available in all sizes):

Our Memory Foam mattresses have the Richfoam as the base core for maximum support. This layer is then topped with an Avela viscoelastic layer for superior comfort. We combined it altogether with a .80 oz. CFR 1633 compliant fire barrier inner layer featuring Protech fiber then covered it with a soft cotton stretch fabric. These mattresses fold easily into our sleeper mechanism.

IV. Fabric/Leather Application

Please be advised that we use the spot match technique as the standard for the fabric application on furniture. The spot match technique simply means that a designated spot on a given print will be centered on all of the main parts of any given piece of furniture, such as backs, cushions, inarms, outarms and outbacks. Therefore, the fabric will not flow continuously down the front of the furniture or any other parts of the furniture. However, we do offer the flowmatch technique for an additional upcharge (see page G). Leather pieces are seamed per industry standards. Non-seaming is available for an upcharge.

Other

I. Sales Aids

All swatches, catalogs, and other sales aid items, whether provided on a no charge basis or at a charge, remain the property of the manufacturer.

II. Shipping Terms

F.O.B. Factory

Order Placement / Acknowledgements

In order to expedite the acknowledgement and production of your furniture, we advise that you make notations on your order regarding the following:

- | | |
|-------------------------------------------|------------------------------------------------|
| 1. Quantity Needed | 5. Cushion (if other than standard) |
| 2. Style Number | 6. Options as offered |
| 3. Finish | 7. Ship To Address |
| 4. Fabric, including Pattern Name & Color | 8. Means of Shipping (Trucking Company or UPS) |

Upon receipt of your acknowledgement, please review for accuracy and notify us IMMEDIATELY of any changes or corrections. *Note: Your acknowledgement will include an estimated ship date.

Cancellations / Changes

Cancellations and changes may be made to an order at no charge if the order has not yet been scheduled for production. **If you wish to cancel or change an order that has already been scheduled, a restocking fee will apply. The amount of the fee will depend on your style, fabric and how far along your order is in production.**

Dimensions

Overall dimensions are listed under each style in this price list. Other approximate dimensions are listed on individual photos in our catalog. **PLEASE NOTE that our furniture is hand-assembled piece by piece, by skilled craftsmen, not stamped from an assembly line. Our frames and furniture are custom made; therefore dimensions may vary from printed size.**

Dimensions are measured as follows:

W (Width) is the widest part of the piece, usually at the outside edge of the arms.

D (Depth) is from the front of the piece to the deepest part of the back including the pitch.

H (Height) is from the floor to the highest part of the back, usually at the top of the back cushion.

SH (Seat Height) is from the floor to the top of the crown of the seat cushion.

SD (Seat Depth) is from the front of the seat cushion to the back cushion or inback if the piece is a tight back. Please note that once the piece is sat in, the back cushion will compress and gain from 2"-4" more depending on the weight of the person.

AH (Arm Height) is from the floor to the top of the arm. If the arm has varying heights, the arm height is based on the front of the arm.

ISW (Inside Seat Width) is from the inside of one arm to the inside of the other arm – full width of the seating area. If the piece is curved the measurement is taken from the middle of the arm.

**** DO NOT REMOVE THIS PAGE!! *** PLEASE MAKE COPIES AS NEEDED!!!! ****

ALL C.O.M. FABRICS SHOULD BE SENT TO: **102 S 7TH AVE
MAIDEN, NC 28650**

Please **complete** the provided packing list form (page M) and **send with your C.O.M.** to us in order to insure proper handling of your order. Please make copies as needed of the form found in this price book.

PRICE ALL C.O.M. **FABRICS** AS GRADE 2.
PRICE ALL C.O.M. **VINYLS** AS GRADE 3.
PRICE ALL C.O.M. **LEATHERS** AS GRADE 5.

WE INSIST THAT YOU INSPECT FABRIC PRIOR TO SENDING TO OUR C.O.M. DEPT.

C.O.D. DELIVERY OF C.O.M. FABRIC WILL NOT BE ACCEPTED!

Some vertical patterns may require seaming. See the "Fabric Application" chart below for complete details.

Unless you give us specific instructions, the "lay out" of the fabric will be at our discretion, and any reworking due to problems in this area must be at your expense. Please help us to get your order right the first time.

C.O.M. ROPE / FRINGE / TRIM

Charges for adding decorative rope, fringe, etc... will be at **1/2** of our standard trim charge. These charges may be found in the Rope & Fringe section found on pages C and E of this price book.

In determining the amount of C.O.M. yardage needed, please refer to the chart on the following page.

FABRIC APPLICATION

RAILROAD

UP THE BOLT

IF HELP IS NEEDED TO CALCULATE COM YARDAGE, PLEASE CALL CUSTOMER SERVICE.

IMPORTANT DISCLAIMER: We reserve the right to refuse to work with unusually delicate or otherwise unusual fabrics which, in our estimation, our sewing equipment is not capable of handling with 100% assurance. In such cases, we will override our own recommendation **ONLY** when the customer assumes **FULL RESPONSIBILITY** for any resulting damage to the fabric, and / or manufacturing quality problems that result directly from problems that are due to the quality of such fabrics.

The COM calculation is an estimated guideline, therefore we can not assume responsibility for any excess yardage due to various pattern lay out. We will return excess, if available, upon request.

Base C.O.M. calculation on the following:

1. Start with 54" Solid Railroad COM yardage requirement found under the price of your chosen style.
2. See chart below to determine additional percentage based on fabric width and largest repeat.

FABRIC WIDTH	Plain RR	Plain UTB	2" - 14" RR	2" - 14" UTB	15" - 19" RR	15" - 19" UTB	20" - 27" RR	20" - 27" UTB	28" - 36" RR	28" - 36" UTB
54"	0%	20%	15%	35%	20%	40%	25%	45%	35%	55%
50"	15%	35%	20%	40%	30%	50%	35%	55%	40%	60%
48"	20%	40%	30%	50%	35%	55%	45%	65%	60%	80%
45"	50%	70%	60%	80%	65%	75%	70%	90%	80%	100%
36"	60%	80%	65%	85%	70%	90%	80%	100%	100%	120%

*The above chart is a guideline **ONLY**. More or less fabric may be needed, depending on other elements of the fabric's design.

3. Add 15% if **flowmatch** is needed.
4. Add the following amounts for **self decks** when using C.O.M.:

Sofa - 2 yds

Loveseat - 1½ yds

Chair - 1 yd

* **Collage COM - Call customer service for yardage.**

* **Due to various options on our Tailor Made (Design Your Own) program, please call customer service for yardage requirements.**

Mark all COM Fabric as follows:

1. Mark front side
2. Mark the direction of the pattern's top

Temple
 Furniture
Cushion Choices
Seat Cushion Choices

Comfort

This cushion uses a thick high resiliency/high density Qualux foam core, wrapped with a continuous layer of dacron fiber that is placed on the top, across the front and bottom of the core, all encased in fabric ticking. The make up of this cushion provides a smooth look, a comfortable supportive feel and also reduces "comfort wrinkles" in the fabric.

Care -- Rotate cushions periodically

Firmness Levels --

Comfort Soft (2.55 Density - 16 lbs. Compression/ILD)

***Comfort Medium (2.05 Density - 21 lbs. Compression/ILD)**

Comfort Firm (2.55 - 27 lbs. Compression/ILD)

Comfort Extra Firm (2.55 - 31 lbs. Compression/ILD)

*Denotes the standard cushion for Comfort cushions

**Plush**

This cushion series provides a similar level of firmness to the Comfort Cushion. It adds a little more comfort because of the fiber wraps and has more crown to the cushion. Some puddling should be expected. Then it is wrapped in a down proof ticking.

Care -- Fluff and rotate cushions periodically

Firmness Levels --

***Plush Soft (2.55 Density - 16 lbs. Compression/ILD)**

Plush Medium (2.05 Density - 21 lbs. Compression/ILD) available at no char

*Denotes the standard cushion for Plush Cushions

Back Cushion Choices

***Fiber Back**

Temple's Fiber back is our standard back insert. The channels of the back insert are blown full with premium Denured Fiber that provides a comfortable but yet supportive back system. Channels are used so the fiber fill does not settle to the bottom of the back.

Care -- Rotate (if loose back) and regulate periodically

*Denotes the standard back cushion

**Flex Back**

Temple's Flex back is constructed with a soft premium foam frame that is filled and wrapped with multiple layers of bonded fiber designed to "flex back" to its unique shape and crown. The Flex back is designed to provide a moderately soft back system that maintains its original shape and appearance long term. The flex back does set firmer than the standard fiber back and is a great option for commercial and high volume environments.

Care -- Rotate (if loose back) and regulate periodically

**Foam Back**

Temple's Foam backs are made up of a predominantly foam core that is covered by dacron all encased in a ticking to provide a "Very Firm" supportive and taut looking back. This type of back is often used in commercial and assisted living environments.

Care -- Rotate (if loose back) and regulate periodically

**See under each style in price list for which seat cushion (Comfort or Plush) is standard for that piece.

Compression / Indentation Load Deflection (ILD) is the pounds of pressure it takes to indent the cushion.

Cushion Choices

Specialty Cushions

Spring Fiber

The center of this core is a Marshall unit of individually wrapped 13.5 gauge coils. The springs are encased in Qualux High Resiliency foam. The core is topped by Dacron polyester fibers and wrapped in a down proof fabric ticking. This seat offers comfort and softness, yet the springs help to maintain the cushion's shape and crown. Cushions will puddle.

Care -- Fluff and rotate cushions periodically

Firmness Levels -- (2.55 Density - 27 lbs. Compression/ILD)

Spring Down

This cushion is similar to the Spring fiber seats, but we add a blend of feathers and down to the fiber wrap. Blend-down is made from a mix of approximately 75% Dacron fiber, 22% feathers and 3% down. This offers an extremely plush, rich feel often sought by designers. With blend-down, you should expect some maintenance. Cushions will puddle. Occasional feathers will appear. This means the cover is doing its job, breathing, which ensures your comfort.

Also Available: Spring Down Package: This combines the comfort of Spring Down seats with down-blend back cushions. Backs will be filled with the same blend mix as the Spring Down cushions. They are enclosed in down proof ticking creating a great feel for the seats and the backs. Any throw pillows included with the style selected will be filled with a mix of 90% feathers and 10% down. Occasional feathers will appear. This means the cover is doing its job, breathing, which ensures your comfort.

Care -- Fluff and rotate cushions periodically

Firmness Levels -- (2.55 Density - 27 lbs. Compression/ILD)

Signature Package

Signature is a package of down-blend seats, backs and throw pillows. This is a value package to achieve a soft, plush feel at a great price. The Qualux core has a rich down blend wrap, and is enclosed in a down-proof ticking. The backs use a blend-down fill, and any throw pillows are filled with a mix of 90% feathers and 10% down. With blend-down, expect maintenance. Cushions will puddle. Occasional feathers will appear. This means the cover is doing its job, breathing, which ensures your comfort.

Care -- Fluff and rotate cushions periodically

Firmness Levels -- (2.55 Density - 27 lbs. Compression/ILD)

Luxe Premium Package

Temple's Luxe Premium is a package for our Generation You collection that consists of seats, backs and throw pillows. The Luxe Premium cushion contains a 4" thick, high modulus, high resiliency core, which is capped on the top and bottom with a 2" thick VX 3010 memory foam layer, the same foam used for comfort layers in mattresses. The top, front and bottom of the cushion is then wrapped with a continuous layer of 1/2" thick dacron fiber, all encased in fabric ticking. This cushion consists of state-of-the-art materials and engineering that provide the comfort of a very soft cushion, but also the resiliency and taut appearance of a firmer cushion. These two attributes create a cushion that is ultra-soft, but still has the bounce back, which offers slow acceleration upon sitting and prevents strong puddling. The sheer weight of this cushion confirms its overall quality.

The Luxe Premium backs and throw pillows are definitely not inferior to the Luxe Premium cushion that they are packaged with in our Generation You collection. The back inserts and throw pillow inserts are filled with microfiber which is less than one Denier in measurement. This microfiber fill is encased in a beautiful natural white down proof ticking with surged seams. This filling provides a luxurious, heavier feel to the backs and throw pillows. Our Luxe Premium backs and throw pillows have the feel of our Signature package, but without the feathers.

The combination of Temple's Luxe Premium cushions, backs and throw pillows is certainly a marriage that was long overdue!

Care -- Rotate cushions periodically

Firmness Levels -- (Core: 2.30 Density - 24 lbs. Compression/ILD)
(Cap 3.00 Density - 10 lbs. Compression/ILD)

Luxe Premium SEAT and BACK cushions available ONLY in Generation You Collection

Compression / Indentation Load Deflection (ILD) is the pounds of pressure it takes to indent the cushion.

Q

Leather Types

- ANILINE** This is the most natural type of all leather and displays natural marks such as healed scars, stretch marks, wrinkles and brands. It does not have a protective coating nor any treatments that alter the natural feel of the hide. This type gives it the most buttery texture and silken feel of all the leather types, however is less resistant to the elements. Aniline is best used on accent pieces that expect only light to moderate use.
- EXOTICS** This leather has been tanned and conditioned ranging from embossed leathers to hair on hide. It is not protected and each hide is different in shading and coloring variations. This should be used as a statement of luxury and a truly unique piece. It would be great in accent areas such as ottomans, benches, borders, outside arms and outbacks.
**Hair on Hide colors may differ from swatch due to "natural" coloring.*
- SEMI-ANILINE** This is the most common type of leather. It is a natural hide that is coated with a slightly protective topcoat that may contain some additional color. You will see some natural markings through the topcoat and it can still stain or fade somewhat, but it is more protected than aniline leather and the color is more uniform. This type of leather is the ideal choice for regular use in households.
- PROTECTED** This type is the least natural and dyed all the way through the hide, but the surface is coated with a heavy protective topcoat that has color added. This leather is usually buffed or sanded to remove imperfections in the hide and then embossed with an artificial grain. The color and texture tend to be flatter, but it is also the most consistent in color, durability and cleanability. This leather is the ideal choice for high-energy family rooms.

Due to leather being a natural resource, it may have scars or imperfections; however, there will be no open scars or holes.

Leather may vary in shading and texture from swatch.

For exact match, cutting approval is required.

Crypton:

We have Crypton available for your special orders. Please contact customer service for pricing.

Care Tips for Fabric:

Cleaning by a professional furniture cleaning service is recommended for all the codes listed below. To prevent overall soils, frequent vacuuming or light brushing to remove dirt and grime is also suggested.

Try to maintain at least two feet between your furniture and heating sources. Prolonged exposure to heat vents or radiators will cause your fabric fibers, cushions, and wood to dry out and become brittle or warped.

Avoid placing your furniture in direct sunlight. All materials will fade over time when placed in direct sunlight.

Do not allow house pets to sit on your furniture. Make sure nearby plants are in drip proof pots and keep foliage from touching the furniture surface.

Avoid placing newspapers and magazines on the fabric to prevent permanent dye transfer.

Keep your furniture free from dust by vacuuming the surface weekly and rotating the cushions to promote even wear.

Blot spills immediately with a clean, white cloth.

Cleaning Codes and Industry Standard Cleaning Methods:

Code "W"	Use a water-based or foam cleaning solvent
Code "S"	Use a mild, water-free dry cleaning solvent
Code "SW/WS"	Use either a water-based cleaning solvent, a dry cleaning solvent or foam cleaner
Code "X"	Vacuum or brush lightly to remove soil

Caution: Use of water-based or detergent based solvent cleaners may cause excessive shrinking. Water stains may become permanent.

For fabric care products contact Textile Master at 1-888-825-6551 or www.unifers.com

Recliner Controls

All recliners are standard with a manual push mechanism, but a motorized mechanism is also available at an upcharge. All wall huggers are standard with a motorized mechanism. These controls will be placed on the right side sitting in-arm. This will allow for a friendly design, easy up lift, and recline movements.

The motorized mechanism features two chrome buttons that are sensitive to touch. You just touch the buttons and they will open or close the recliner.

The motorized mechanism with a USB charging port is also available upon request at no additional charge.

Battery packs are available, if requested, at an upcharge.

Mechanism

Both of the sleeper mechanisms are professional units constructed of heavy-gauge tubular steel and feature a tilt TV-Headrest.

Most of our styles have 75" long units; however, our hi-leg styles, chair sleepers and styles #2000-2600 have 72" long units. Contact customer service if you have any questions.

FEATURES and BENEFITS

- All tubular design - Increased strength, durability, and safety.
- Riveted crosswire support system - Enhanced support in the seating and sleeping position.
- Contoured seat section - Wider seating area with improved comfort next to the arms.
- Double-locking TV headrest - Secure support, unit will not close with TV headrest in the locked position.
- Anti-tilt link - Ensures the mechanism will remain in contact with the floor.
- Deep sew line - Improved seating comfort, eliminates deck crown.
- One-piece all tubular legs - Greater support in critical weight areas.
- One-piece contoured head tube and mattress retainers - Secure mattress retention throughout operating cycle.
- Weight balanced linkage design - Easiest operating and most durable linkage available.
- Seat Crosswires - For enhanced comfort.

Mattress - Standard

All sleepers feature a deluxe innerspring mattress with hypoallergenic padding.

Sizes: Queen 60" x 75" x 5½" Full 53" x 75" x 5½" Twin 41" x 75" x 5½"

Hi-leg styles, chair sleepers and styles #2000-#2600:

Sizes: Queen 60" x 72" x 5½" Full 53" x 72" x 5½" Twin 41" x 72" x 5½" Chair 32" x 72" x 5½"

Air Mattress - Optional

With the convenient easy-to-use hand held remote control pump, inflating and deflating are a breeze. In no time at all, you'll be resting comfortably!

(Twin Sizes are not available as an Air Mattress.)

- "Air Dream Ultra" is 11" of pure comfort.
- Inflates in under one minute with hand held remote control.
- Innovative technology combines spring coil support with a cushioning layer of air.
- Touch button firmness adjusts from plush firm to supportive soft feel.
- Deflates easily and quickly for fast storage in the sleep sofa.

Memory Foam Mattress - Optional

With an upgrade that overcomes all comfort negatives of an innerspring sleeper mattress, but still has all the comfort and durability.

- Cover - Soft cotton stretch fabric
- Fire barrier inner layer featuring Protech fiber
- Viscoelastic top support layer of superior comfort
- Richfoam base core for maximum support
- Folds easily into a sleeper mechanism

Local Repairs

All furniture should be inspected for freight damage and defects upon delivery. Should any problems be found, the factory should be notified at once. We will then determine the best course of action to be taken. **Charges for repairs will not be accepted without prior approval from the factory. Freight damage is to be rectified with your freight carrier. Contact your freight carrier immediately.**

Returns and Freight Charges

Written authorization **must be obtained** from the factory prior to any items being returned. In the event a piece of furniture is to be returned to Temple, Temple is responsible for the freight to ship the furniture back to our factory from the original ship to location. It is the customer's responsibility to have the furniture sufficiently wrapped and ready for pick up at the original delivery address. Once the repair is completed at our factory, the furniture will be returned to the dealer **FREIGHT COLLECT**. In the event there is a free astray agreement with the carrier, there will be no freight charges incurred by either party. Temple is not liable for freight charges to ship replacement items.

Frame

Our frames are constructed of kiln-dried and engineered hardwoods, featuring state of the art interlocking design for maximum durability. Each frame is guaranteed against warp, breakdown or instability for the **LIMITED LIFE** of the frame as upholstered in the original fabric.

Spring

Spring construction and all support of backs and seats, exclusive of cushions, is guaranteed against breaking or significant slippage for **LIMITED LIFE** under normal stress.

Seat Cushion

All cushions are warranted as **LIMITED LIFE**. Frequent turning and fluffing will extend the life of all cushions and fabrics. In the rare incidence that your cushion(s) needs to be replaced, you must supply the original acknowledgement number. Our warranty is valid only if the furniture has received normal usage and has not been subjected to abuse. Cushion warranty is for the loss of cushion resiliency and not normal flattening or softening of cushions. Softening and flattening of cushions occur with foam and fibers as a result of regular use and aging and should not be considered manufacturing defects. We are not liable for freight charges to ship replacement cushions.

Sleeper Mattress and Mechanism

Our deluxe 5½" mattress and its accompanying deluxe folding bed unit have a warranty of **FIVE YEARS**. There is a **LIMITED THREE YEAR** warranty on our Air Dream Ultra mattress.

- Recliner Mechanism - 3 years
- Glider & Swivel Mechanism - 2 years

Battery Packs

The motorized mechanism available for our recliners is used in both the two chrome "touch" buttons and the buttons with the USB charging port. A battery pack is available for these at an upcharge and is guaranteed for **ONE YEAR**.

Fabric

We offer a full **ONE YEAR** warranty (**starting from the date the order ships from Temple**) against wear under normal use and with proper care. This warranty does not cover fading or pilling, which sometimes occurs with normal use of some fabrics and is not valid where there is evidence of heavy soiling. We reserve the right to replace only the portion of fabric that is defective. Replacement fabrics may vary some in dye-lot from the original fabric. However, we will make every effort to match the dye-lot. All claims, within warranty, will be submitted to the fabric mill for evaluation. We will warrant only if the mill states that there is an actual fabric defect. Fabric manufacturers will not honor warranties if there is evidence that the furniture was exposed to a pet, therefore voiding our fabric warranty. Pets are abrasive to fabric and should not be allowed on your furniture. The fabric warranty is also null and void if the fabric is improperly cleaned. Care of the fabric is important. Cleaning by a professional furniture cleaning service only is recommended for all our fabrics. To prevent overall soil, frequent vacuuming or light brushing to remove dust and grime is also suggested. It is imperative that the seat cushions be turned twice monthly to get maximum wear from both the fabric and the cushioning.

<p>PLEASE BE ADVISED THAT TREATMENT OF THE FABRIC WITH ANY KIND OF STAIN REPELLANT, OR ANY AFTER MARKET CHEMICAL TREATMENT VOIDS OUR FABRIC WARRANTY.</p>

L15	L8

If a Parker Southern fabric converts to a Temple grade higher than 17 or a leather grade higher than L8, please contact customer service for pricing.

Pillow Trims:

Interchanging rope & fringe for either company is priced with the company that produces the trim. For example, if Parker Southern "Specialty" trims are used on Temple styles, then Parker Southern pricing is used to calculate the upcharge for that trim.
