

## **Creative Accents Fibers**

### **Wool**

Creative Accents wool is imported in collaboration with the Wools of New Zealand and is available in both Auto+Graph and plush grades.

Wool is also available in shag rugs, but we recommend mixing it with the nylon indosheen to improve the loft.

### **Nylon**

All of Creative Accent's nylon is produced in the US. They offer two different types of nylon.

1. Standard Nylon: appears and feels similar to wool and is available in both Auto+Graph and plush grades.

2. Indosheen Nylon: is a higher luster nylon with a soft hand. It is the preferred fiber for shags and is available in cut pile and loop in any area of an Auto+Graph grade rug.

In plush grade rugs, we recommend indosheen only as a detail fiber (in cut pile or loop) but not as a primary background fiber.
